

Shot Blasting Fabrication

DATASHEET

Cutting Edge Fabrication (CEF) is an ISO 9001:2015 certified metal fabrication company specializing in welding large metal structures and weldments. The CEF team has extensive experience fabricating custom industrial shot blasting equipment, manufacturing a full range of components, including blast cabinets, blast wheel housings, rotating drums, and barrels.

- **Shot Blast Cabinets**
- **Rotating Drums**
- **Blast Wheel Housings**

We fabricate shot blast cabinets and drums in a multitude of sizes and complexity. Regardless of design, CEF is ready to execute your plans to specification.

Material Types: angle, bar, beam, billet, channel, plate, sheet, and tube

Metal Construction: Aluminum, AR plate | abrasion resistant plate, armor plate, carbon steel, heavy steel plate, alloy steel, iron, manganese, nickel-based alloys, sheet metal, stainless steel, and structural steel

Services: Welding, Metal Forming, Bump Forming, Metal Bending, State-of-the-Art Plate Cutting, Laser Cutting, Plasma Cutting, Oxy-Fuel Cutting, Shearing, High-Performance Production Sawing, Cold Sawing, Band Sawing, Precision CNC Machining, Complete Assembly, and Quality Inspection

Certifications: ISO 9001:2015, AWS, and ASME

Depend on Cutting Edge Fabrication for your high-quality, durable, abrasion-resistant blast wheel shells.

Experts at Cutting, Forming, and Welding Manganese and AR | Abrasion-Resistant Plate!
